SPECIFICATIONS

EMBROIDERY

M12™ Heated Gear must be embroidered in certain areas to AVOID DAMAGING HEATING ELEMENTS.

- M12™ TOUGHSHELL™ Jackets, M12 AXIS™ Jackets & Vests, and M12™ Heated Hoodies can be embroidered above the yoke seam or on the sleeves (see below)
- Always consult the person performing the embroidery and reach out to the Milwaukee Marketing team with any additional questions.

Screen Printing/Laminating can be performed in the same areas, as long as the application temperature doesn't harm the garment material

FREQUENTLY ASKED QUESTIONS

How do you turn the M12™ Heated Gear range on?

Press and hold the M12™ Button or Pockets Button for 2 seconds to turn on. After the jacket or vest is on, each press will change between High, Medium, and Low heat settings.

What do the button colours represent when changing the heat setting?

Red = High, White = Medium, Blue = Low

What products ship with a M12™ Compact Charger & Power Source (M12TC-0)?

M12™ TOUGHSHELL™ Heated Jackets (Black, Grey) and M12 AXIS™ Heated Jackets (Black, Olive Green, Black Women's). The M12 AXIS™ Heated Vests and HYDROBREAK™ Jackets do not ship with the M12TC-0. The HYDROBREAK™ Jacket is not a heated item, falling within the workwear range.

Can M12™ Heated Gear be powered with an M18™ Battery?

Yes, all M12™ Heated Jackets are compatible with M18™ if the user purchases the accessory M18™ Power Source (M18USBPSHJ).

How do I find the correct size for my customer?

Sizing information can be found on packaging, on slide 11.

Where can embroidery be done on M12™ Heated Gear?

Heated Gear products can safely be embroidered above the yoke seam and on the sleeves. See Slide 12 for further information.

Are part numbers for the range the same as previous years?

Yes, each of M12™ TOUGHSHELL™ Heated Jackets, M12™ Heated Hoodies, M12 AXIS™ Jackets and Vests, and the HYDROBREAK™ Rainshell are returning lines. These have the same part numbers as in 2020.

FREQUENTLY ASKED QUESTIONS

How do you turn the REDLITHIUM™ USB Heated Base Layer on?

Press and hold the REDLITHIUM™ USB button for 2 seconds to turn on. After the base layer is on, each press will change between High and Low heat settings.

What do the button colours represent when changing the heat setting?

Red = High, Blue = Low

Does the Heated Base Layer come with a battery?

Yes, the Heated Base Layer Kit comes with a REDLITHIUM™ USB 3.0Ah Battery. It also ships with a USB Charger/Controller, Heavy Duty Cord, and Adaptor.

How do I find the correct size Heated Base Layer?

Sizing information can be found on packaging, on slide 4.
